Industrial Pretreatment Questionnaire

The City of Avondale, in accordance with 40 CFR (Code of Federal Regulation) 403.8(f) (2) and the Pretreatment Program development, is mandated to identify, locate, and evaluate all possible industrial and commercial users and their processes. The purpose of conducting this survey is to help control several aspects of waste discharged into our system. Your information will contribute to:

- Protecting our community and employees from health or safety hazards created by harmful waste pollutants.
- Prevent pass-through of pollutants contaminating the quality of our final reclaimed water and bio-solids of our treatment plant.
- Protect our treatment process from interferences by pollutants.
- Extending the life of our infrastructure for both sewer collection system and our treatment plant facility by controlling the pollutants.

Not only is it our mission to produce quality reclaimed water but it is mandated on the Federal, State, and local level. To support our mutual goal as a community to improve and maintain our precious water resources we are requesting each industry and business in the City of Avondale to respond to this survey.

Please take time to complete this survey and return it to the above address.
For any questions or assistance please contact:

Lynn Lichtenberger
Pretreatment Coordinator
